Abdullah Mahmoud Zaghloul

Automation Specialist · Content Systems · AI Voiceover

Alexandria, Egypt | +20 106 988 8185 | abdullah.m.z2005@gmail.com | linkedin.com/in/abdullah-zaghloul | github.com/Abdullah-Zaghloul

PROFESSIONAL SUMMARY

Results-driven Software Engineering student at Alexandria University with hands-on experience building automation systems, managing content production pipelines, and delivering AI-powered solutions for remote clients. Proven ability to reduce manual workload through intelligent n8n and Python workflows, with a strong track record in freelance project delivery and cross-functional collaboration.

TECHNICAL SKILLS

Automation & AI: n8n, Python, Playwright, REST APIs, Telegram Bot API, Web Scraping, Prompt Engineering

Mobile Development: Flutter, Dart, REST API integration, SharedPreferences, Firebase Auth

Content & Media: YouTube Scriptwriting, AI Voiceover (ElevenLabs, Murf), Thumbnail Design, SEO

Backend & DevOps: FastAPI, Docker, Docker Compose, PostgreSQL, Linux CLI

Game Development: Unity, C#, Finite State Machines, NPC AI

Project Management: Excel (Advanced), Budget Tracking, Operations Management, Remote Team Coordination

Languages: Arabic (Native), English (Professional)

EXPERIENCE

Automation & Content Systems Specialist — 2023 – Present

Dravexa YouTube Channel · Remote

- Designed and maintained a full content production pipeline for a US-targeted financial literacy channel (55+ audience), covering script research, AI voiceover generation, and publishing workflows.
- Engineered an n8n automation system that monitors freelance platforms (Upwork, Freelancer) for relevant job postings and delivers instant Telegram notifications, reducing manual search time by ~80%.
- Developed structured scriptwriting templates and prompt engineering systems to ensure consistent editorial voice across 30+ long-form videos.
- Produced AI voiceovers in multiple dialects (Egyptian Arabic, Gulf Arabic, American English) using ElevenLabs and Murf.

Sports Facility Operations Manager — 2022 – Present

Private Sports Club · Alexandria, Egypt

- Managed daily operations, staff scheduling, and financial reporting for a sports facility.
- Built Excel-based financial tracking dashboards for revenue, expenses, and monthly P&L reporting.
- Improved booking efficiency by streamlining customer communication and reservation workflows.

PROJECTS

Freelance Platform Monitor + Telegram Alerts | n8n · Python · Telegram Bot API 2024

- Built an automated monitoring system that scrapes Upwork, Freelancer, and similar platforms for new job posts matching predefined criteria (keywords, budget, client rating) and sends structured Telegram alerts in real time.
- Reduced daily job-hunting time from 45+ minutes to under 5 minutes through full automation.

Flutter News Application | Flutter · Dart · REST API · SharedPreferences 2024

- Developed a full-featured cross-platform news app with JWT authentication, category filtering, persistent favorites, and clean widget architecture as a university capstone project.
- Implemented local data persistence using SharedPreferences and integrated a live news REST API.

Unity NPC AI System (FSM) | Unity · C# · Finite State Machine 2024

- Implemented a modular Finite State Machine architecture for NPC behavior including patrol, chase, attack, and idle states with smooth transition logic.

Cloud Computing REST API | Python · FastAPI · Docker · PostgreSQL 2024

- Containerized a full REST API service using FastAPI and Docker Compose with PostgreSQL as the data layer, deployed as part of a cloud computing university module.

EDUCATION

B.Sc. in Software Industry & Multimedia 2022 – 2027 (Expected)

Faculty of Science, Alexandria University · Alexandria, Egypt

- Relevant coursework: Cloud Computing, Information Retrieval, Mobile Development, Software Engineering, AI & Game Systems.

ADDITIONAL

Availability: Immediately available · Open to remote full-time, part-time, and freelance roles

Work Authorization: Egyptian national · Available for remote international work

Interests: AI Automation, Content Monetization, Remote Work Systems, Startup Operations
